

MEMORANDUM FOR: Director of Communications

VIA: Acting Deputy Director for Administration

FROM: James H. McDonald
Director of Logistics

SUBJECT: New Communications Support Requirements
for FY 1980 - 1984 [] 25X1

REFERENCE: Mult adsee memo dtd 21 Oct 77 fm A-DDA,
subject: Submission of New Communications
Support Requirements (DDA 77-5652; OL 7-4837)

25X1 1. [] In accordance with referent memorandum, we have reviewed our communications requirements for the period FY 1980 - 1984. The requirements previously provided for the period FY 1979 - 1983 remain unchanged. Additional requirements, both firm and conceivable, are as follows:

a. FY 1980

25X1 (1) [] A firm requirement exists to transmit (computer to computer) graphics material produced on a device similar to the Genigraphics from the Headquarters Building to the Printing and Photography (P&P) Building.

25X1 (2) [] A backup for the infrared transmission system will be required in FY 1980, or possibly sooner, to achieve the necessary reliability. As you know, your office has scheduled the installation and testing of the infrared system between the Headquarters and P&P Buildings for January 1978. This link should be operational by April 1978 and will be capable of handling ETECS, computer output microfilm, and MIS related traffic. According to current plans,

OL 7 4837(a)

25X1
